Feel Green complies with high sustainability criteria. Growers strive for the lowest possible CO_2 emissions. They are Global or MPS-Gap and MPS-SQ certified, which means they meet strict requirements in terms of product traceability, hygiene and social aspects. Feel Green products are Product Proof, which involves a transparent process for the registration of the correct (organic) crop protection. The packaging and the label are made of degradable and renewable materials. The use of plastic is minimal.
All Feel Green products are supplied in a cardboard tray or multi-use packaging.
The final ingredients for Feel Green are the grower's unprecedented attention and love for the product. In this way, we ensure a green environment full of sustainable plants for living in.
